SHEER BEAUTY

A leader in product development and innovation, CaesarStone introduces its latest inspirational and unique surface, **Small White Quartz**. Part of the luxurious Concetto range, Small White Quartz combines nature and technology to create a stunningly beautiful surface.

Small White Quartz is semi translucent, featuring tumbled white quartz suspended in a high performance resin. Its translucency, randomly shaped pebbles and 3 dimensional qualities make this unique surface highly tactile and interesting.

Small White Quartz can be used on both vertical and horizontal surfaces and is ideal for applications such as blade walls, privacy screens, table and counter tops, feature panels and custom-made furniture surfaces. Suitable for both commercial and residential projects, Small White Quartz is available in single or double sided polish and can be backlit to create the ultimate luxury stone surface.

The manufacturing technique used to create Small White Quartz' unique look has been carefully developed to maintain the integrity of CaesarStone's high-quality standards and physical properties. Suitable for wet and dry areas, it is highly heat, stain and scratch resistant offering superior properties of strength and durability.

As with all CaesarStone surfaces, this versatile product is non-porous and low-maintenance and comes with a 10 year limited warranty. Small White Quartz can be viewed in large sample sizes in showrooms nationally and is available by special order.

For further information on Small White Quartz please call Linda Hannah on 02 8197 4917.
